PROFESSIONAL SUMMARY

Software Engineering graduate with a major in Data Science from Daffodil International University, with a strong foundation in data analysis, database systems, and machine learning. Skilled in SQL, Python, Power BI, and Tableau, with hands-on experience in dashboard development, data preprocessing, feature engineering, and relational database design. Applied these skills through a CNN-based thesis project, a business intelligence dashboard, and a Python/SQL hospital management system. Holds AWS and Google certifications, with demonstrated strengths in analytical thinking, problem-solving, and clear communication. Seeking an entry-level opportunity to apply technical and analytical skills in a growing organization.

CORE SKILLS

Data Analysis & BI: SQL, Python, Power BI, Tableau, Data Mining, Dashboarding, Business Intelligence, Dataset Interpretation, Data Evaluation, Reporting

Machine Learning & Deep Learning: TensorFlow, Keras, CNN, Neural Networks, Pattern Recognition, Transfer Learning

Programming & Databases: Python, SQL, C, JSON

Soft Skills: Analytical & Problem-Solving, Attention to Detail, Communication & Presentation, Leadership

Spoken Languages: English (Fluent), Bangla (Native)

EDUCATION

B.Sc. in Software Engineering (Major in Data Science) *2022 – 2026*
Daffodil International University, Dhaka | CGPA: 3.29/4.00

Higher Secondary Certificate (H.S.C.) *2020*
Barishal Govt. Women's College, Barishal | GPA: 5.00/5.00

Secondary School Certificate (S.S.C.) *2017*
Barishal Govt. Girls High School, Barishal | GPA: 5.00/5.00

PROJECTS & RESEARCH

A Hybrid Deep Learning Framework for Improved Breast Cancer Classification
Undergraduate Final Year Thesis, Daffodil International University | TensorFlow, Keras, CNN

- Developed a hybrid CNN-based deep learning model for breast cancer classification, performing data preprocessing and feature engineering across 7,000+ records.
- Evaluated model performance using Precision, Recall, and F1-score to validate classification reliability.

Foodpanda Business Intelligence Dashboard — Personal Project *GitHub*
Power BI, SQL, Python

- Designed and built an end-to-end Power BI dashboard analyzing 6,000+ orders across 5 restaurants, covering BDT 14.34M in revenue, to surface performance and customer trends.
- Created KPI cards, monthly revenue trend visuals, and customer segmentation views, with interactive slicers enabling stakeholders to filter by restaurant, time period, and segment.

Machine Learning Projects — *Python, Numpy, Pandas, Matplotlib* GitHub

- Built a Customer Review Sentiment Analysis Project. Predict whether a customer is likely to purchase a holiday package using customer-related information and machine learning.
- An end-to-end Natural Language Processing (NLP) project that classifies IMDb movie reviews as positive or negative.

Hospital Management System — *Academic Project | Python, SQL*

- Built a backend system automating hospital workflows, designing relational database schemas and optimized queries to support performance reporting.

CERTIFICATIONS

- Google Data Analytics Professional Certificate — In Progress
- Google AI Fundamentals Course Certificate — 2026
- AWS Machine Learning Certificate — 2025
- AWS Natural Language Processing (NLP) Certificate — 2025

EXTRA-CURRICULAR ACTIVITIES

- Executive Member, DIU Software Club — Coordinated cross-team planning and execution of departmental programs.
- General Member, Data Science Club and DIU Readers Club — regular participant in technical discussions.
- 3-Minute Thesis (3MT) Competition — presented a research idea to a panel within a strict time limit; placed in the top 5.
